U.S. Equity (as of 04/19/2018)

Commentary

Analyst expect corporate profits to rise upward of 25% for 2018 on a year-over-year basis. Strong economic growth, a weakening dollar boosting international revenue and the corporate tax cut are all working to boost U.S. corporate profits. However, the effects of the tax cut is likely to have less impact on profit growth in following years as business adjust and increased competition reduces above average profitability. It is also important to remember that the stock market is forward looking and market sentiment now is largely looking past the current economic circumstances and on to potential risk: such as the rising tensions between China over its trade practices, seemingly protectionist trade policies from the U.S. and geopolitical risk from North Korea, Russia and the like. The changing sentiment is reflected in the VIX, which has increased in 2018, after years of declining.

^(*) The CBOE Volatility Index (VIX) is a popular measure of the stock market's expectation of volatility implied by S&P 500 index options, calculated and published by the Chicago Board Options Exchange (CBOE).

International Equity (as of 04/19/2018)

Commentary

Economic growth internationally continues to tick up. The purchasing Managers Index, a survey used to gauge business optimism, remains largely positive across the globe reflecting a global economic expansion. However, no region appears to be in a boom or bust cycle, but rather a steady growth environment leading to stable commodity prices and a positive environment for investors. Additionally, international equity valuations remain below historical averages with higher dividend yields than in the U.S. market. Further dollar weakness, which may be likely with concerns over trade, may add a tail wind to returns.

The Federal Mineral Leasing District Portfolio

8.0) ROSECAP QUARTERLY REPORT

1/29/2018 - 4/19/2018

ACCOUNTS

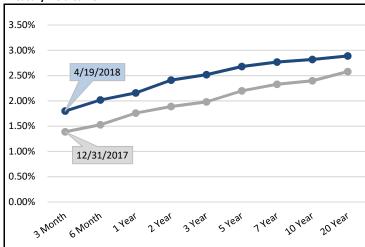

XXXXX6147......Federal Mineral Leasing District - Tax-Free Investment

Fixed Income (as of 04/19/2018)

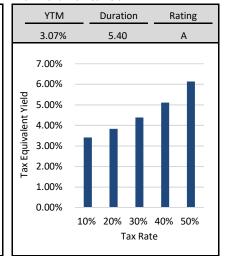

Commentary

The 10 Year treasury rate ended the quarter just shy of 2.75%, up from 2.34% at the end of December. Many analyst are forecasting the 10 year to end the year anywhere from 3.25% to 3.5%, based primarily on the assumption of 2-3 Fed rate hikes yet to come in 2018 (resulting in an increase of+0.50% to +0.75% in the Fed Funds Rate). It becomes increasingly difficult to reduce portfolio risk with the use of fixed income assuming rates do in fact rise as projected. Historically, the greatest risk reduction is by holding fixed income with longer duration; however, longer duration has the lowest expected return in this environment due to its price sensitivity to changing rates. Hedging both equity market risk and the risk from rising rates require holding shorter maturity fixed income, and in greater proportion then what could be accomplished with long duration fixed income.

Currencies & Commodities (as of 04/19/2018)

Commentary

Commodities have risen slightly to start 2018 as the U.S. Dollar weakened. This inverse relationship has held up historically not because of supply and demand dynamics, but due to the Dollar's important role in commodity transactions globally. When the dollar weakens, but the economic value of a commodity is unchanged, the price of the commodity will increase in price for Dollar denominated purchases. The relationship has held up quite well since July 2017, with the falling dollar accounting for much of the price increases in commodities.

Footnotes & Disclaimer

Footnotes:

- (1) Quarter and Year to Date (YTD) returns calculated using price increases and dividend reinvestment as of 04/19/2018.
- (2) Risk is measured using the annualized daily standard deviation of returns over a one or five year period ending 04/19/2018.
- (3) Foreign exchange is the change in the local currency relative to the U.S. Dollar. A positive value represents a strengthening of that country's currency to the USD.
- (4) The roll yield is a period return expected due to the price difference in two similar contracts maturing at different dates with no change to the underlying commodity spot price.
- (5) Valuation Measures:

Price to Book (P/B) is a financial ratio used to compare a company's book value (accounting value held by shareholders) to its current market price.

Price to Earnings (P/E) is the measure of the share price relative to the annual net income earned by the firm per share.

Price to Free Cash Flow (P/FCF) is the price per share divided by cash flow per share. The P/FCF tells an investors how much they are paying for each additional dollar of cash flow.

Earnings Yield is earnings per share from the previous four quarters divided by the share price.

About RoseCap

RoseCap Investment Advisors is a fee-only, independent, investment advisory firm. We provide portfolio management, financial planning, and retirement plan services to both institutions and individuals & families. While investment returns can never be guaranteed, RoseCap does guarantee that we will work with honesty and integrity to provide unprecedented client service and to do what is best for the client.

A Better Business Model

RoseCap chose to be an independent, fee-only, investment advisor because we believe this provides the best level of service for our clients. As an independent advisor, RoseCap is free from the influence of large institutions. Also, as a Registered Investment Advisor under the Investment Advisors Act of 1940 we are obligated to act as a fiduciary on behalf of our clients. Fiduciary duty is not only something that RoseCap accepts, but it is something we welcome. In addition to providing objective investment advice to our clients, we avoid selling high commission products such as life insurance and annuities to clients. Taking the role of a trusted advisor rather than selling investment products is something that is very important to RoseCap, and is hopefully important to our clients as well.

Ethical and Professional Standards

RoseCap has adopted a set of ethics codes, standards, and guidelines that we believe are among the highest in the investment industry. These include the CFA Institute's Code of Ethics and Standards of Professional Conduct, the Asset Manager Code of Professional Conduct, and the Global Investment Performance Standards.
